

Soheyl Delshadnamini

A seasoned frontend engineer with over six years of experience in creating dynamic, pixel perfect, and user-centric web applications. My journey in web development began with co-founding Zoodfood, and since then, I've continued to refine my skills at startups and well-established companies, contributing to the development of scalable codebases and collaborating closely with cross-functional teams. I'm passionate about leveraging my expertise in technologies like React and TypeScript to deliver seamless user experiences, and I'm excited about the opportunity to bring my skills to create something extra ordinary.

Technical Skills

Solid skills: HTML/CSS, JavaScript, TypeScript, React JS, React router Dom, Redux, React query, SASS, CSS modules, Storybook, Bootstrap, Tailwind CSS, Vite, Vitest, Jest, Playwright, React Testing Library, React UI libraries (Mantine UI, Material UI, Chakra UI), Next JS, Next auth, Agile, Scrum, Git, UI/UX, Figma, Adobe Creative Suite

Deep familiarities: React native, Expo, Nodejs, NestJs, Prisma, GitHub actions/workflows, CI/CD, Three.js, AWS (S3, CloudFront, Lambda), GraphQL, PHP/Laravel, SQL

Other skills: Front-end architecture, Unit tests, Component tests, Integration tests, End to end tests, Debugging, Implementing design system, Responsive web development, Animation, Motion graphics

Soft Skills

Fast learner - Critical thinking - Problem solving - Communication skills - Teamwork - Ability to work under pressure - Ability to handle tight deadlines - Adaptability - Decision making - Interpersonal skills - Extremely passionate about coding and clean code.

Work Experience

Front-end developer at [Levr](#) Technologies inc.

Vancouver, BC, Canada. Sep 2022 – Jan 2024

- Being the architect frontend developer, I developed the client-side app from scratch using Mantine UI resulting in the codebase becoming 50% smaller with almost double the performance comparing to the existing MVP.
- Created Scalable, testable, and maintainable codebase from scratch which currently to this day is large segment of existing codebase.
- Created MVC pattern with react for the separation of the logic and presentation with automatic dependency injection.
- Created various components to share across the app.
- Built Role based authorization system in react.
- Fully integrated Redux using redux toolkit and redux tool kit query for APIs.
- Worked closely with other front-end developers to create new features and maintain the codebase.
- Collaborated with the product team to deliver pixel perfect implementation of their design.

Front-end developer at [snappfood.ir](#)

Tehran, Iran. Dec 2019 – Jun 2022

- Developed components based on ES6 TypeScript in NextJs using APIs.
- Developed basket component using redux state management, contributing to improve order processing time.
- Created engaging landing pages with gamification elements for marketing resulting the organic reach out by 25%.
- Developed templates and components for the client side PWA App.
- Developed internal admin panel for biker marketing group resulting in 30% increase in handling CRM tasks for delivering party.
- Led a front-end development course for non-developer employees in a job rotation program (resulting in two students being hired as junior front-end developer)

Web developer at Niroo Sanat Gostar Peyman

Tehran, Iran. Feb 2018 – Dec 2019

- Website template development in Html/CSS and JavaScript(jQuery)
- Feature development and maintenance of support panel and CRM panel

Educations

Bs. In Electrical engineering at Fars science and research university

Tehran, Iran. Sep 2005 – Apr 2012

Front-end Developer professional certificate at Meta-Coursera

Vancouver, BC, Canada Sep, Aug 2022
